

650/650V

0.25 to 110kW

DESCRIPTION

The 650 and 650V series is a family of ac drives that provide a no-fuss, cost effective solution for the simplest to most complex open-loop ac motor control applications.

The 650 has single key selectable preprogrammed applications so set-up is quick and easy without unnecessary complications.

In addition the 650V has the added benefit of an ultra-high torque sensorless vector algorithm and the control flexibility of fully configurable Function Block Programming.

Powers are available up to 110kW on 400V three phase supplies and 45kW on 230V supplies and all units are available with integral EMC compliant filters.
